

ALUM

STRIPLIGHT ALUMINIUM COVE CHANNEL

This deep Aluminium channel exhibits a round frosted diffuser and is an excellent housing for LED strip lights. Specially designed to draw heat away from LED strips resulting in a cooler operating temperature and a longer LED lifetime. This extra depth ensures a uniform light output with no visible light dots or hot spots.

Ideal for a variety of applications for both indoor and outdoor, such as shelves, coves, steps, stair cases and around water features (Suitable for IP65 and IP 68 strip lights).

Available in transparent, frosted and opal diffuser.
