

INSTALLATION INSTRUCTIONS

WW440119

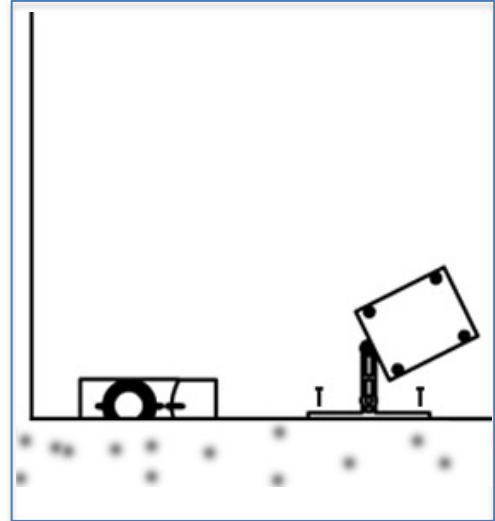

Important Instructions. Please read first.

- Please follow instructions carefully. Failure to do so will void the warranty. Please ensure installation complies with local law and applicable standards.
 1. Only use a GLP power supply unit.
 2. Ensure correct input voltage is connected to the luminaire.
 3. Ensure the power is disconnected before making any connections.
 4. Do not make modification nor alter the luminaire without written approval from GLP.
 5. Ensure to keep luminaire in a clean area free of debris.

INSTALLATION

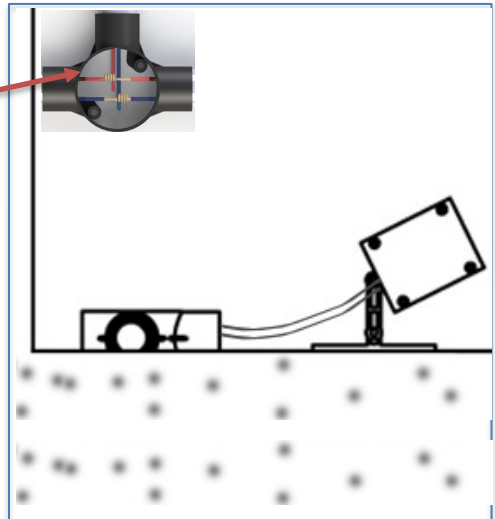

- **Step 1:** Find the location where the luminaire has to be installed. Install a suitable wiring from the power supply (24VDC) to the luminaire.
- **Step 2:** Mount the luminaire onto a hard surface using appropriate stainless steel screws as illustrated.

- **Step 3:** Connect the luminaire input cable to the main power supply (24VDC) cable. Ensure the junction box is installed within one meter from the luminaire. (Do not cut the main power supply cable, just remove insulation, twist the luminaire input cable around the main cable). Solder the connections, wrap the connection with 3M waterproof tape & electrical tape and keep all the connections inside the junction box as illustrated.

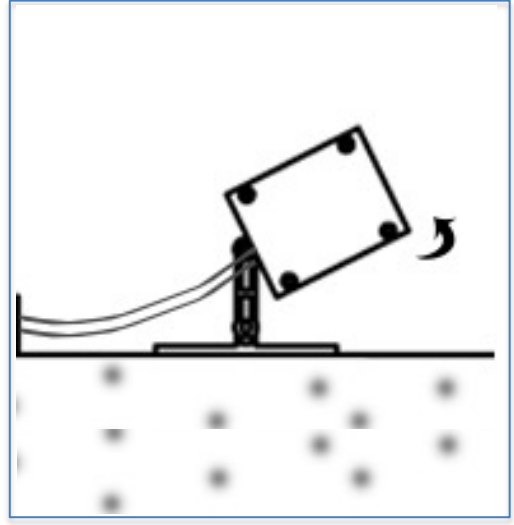

DO NOT
CUT MAIN
CABLE

**GLOBAL LIGHT
& POWER LLC**
AN LED LIGHTING COMPANY

- **Step 4:** Adjust the luminaire angle by allen key.

Make sure the main power is switched off during installation.

All the Installation and Maintenance must be done by Technicians and Professional Engineers
